6. Features of the Scheme

I. Rationale behind the Scheme

Jayashree Polymers Private Limited was incorporated during 1996 and since then it has expanded its business into multiple verticals and geographical locations. Over the last three decades, the business has experienced marketable growth and transformation.

As the business continues to grow and diversify, the same is demanding for each business to have an independent management to maximize efficiency, drive performance and expansion. The complexity and unique demands of our various verticals and geographical locations necessitate dedicated leadership teams that can focus on the specific challenges and opportunities within their respective markets. By establishing independent management for various segment, it will enhance accountability, foster innovation, and ensure that strategic objectives are met more effectively.

Further, in the said new era of operations and given above, it is proposed to divide the business operations amongst the Promoters' families, in a manner which allows the newer generations to unlock more value from the conglomerate whilst preserving the goodwill and credibility of the brand. This arrangement allows the families to independently run the management and operations of the allocated undertakings without any conflict. This approach will empower the leaders and the management of the respective segments to make agile decisions tailored to their segments, ultimately driving sustainable growth and improving overall organizational performance.

The Scheme is expected to enable better realization of potential of the businesses and yield beneficial results and enhance value creation for the companies, their respective shareholders, employees, creditors and other stakeholders.

In addition to the above, the Scheme is expected to reap the following benefits:

- Specialized Management: By establishing separate management based on the requisite skills and expertise, the Scheme aims to enhance core business operations of the respective undertakings

and business operations. This specialization is anticipated to lead to streamlined operations and improved management control.

- (ii) **Focused Strategy:** The Scheme will enable the management to concentrate on the business of the respective undertaking, thereby allowing the management to efficiently explore opportunities and develop strategies tailored to the specific needs of the respective business undertaking.
- (iii) **Effective Risk Management:** The separation of the businesses will facilitate the implementation of distinct risk management strategies for each entity, leading to more effective risk mitigation and potentially reducing the overall risk profile of the group.
- (iv) **Investment Attractiveness:** Currently, the conglomerate structure may deter investment in individual operations. The Scheme will allow investors to selectively invest in companies that match their risk and reward expectations, thereby enhancing the commercial feasibility of attracting investments.
- (v) **Strategic and Financial Flexibility:** Post restructuring, each entity will have the autonomy to engage in strategic and financial arrangements independently, which is expected to enhance their capability to pursue collaborations and expansions that are best suited for their market segments.
- (vi) **Simplification and Rationalization:** The Scheme will lead to a simplification of the holding structure, making it more rational and manageable. This is in line with the objective of creating a leaner and more focused corporate structure.
- (vii) **Alignment with Industry Best Practices:** The scheme will align the operating structure of the businesses with industry best practices, allowing for strategic focus and financial arrangements that are tailored to the distinct nature of risks involved in each business.

The Scheme is being proposed with a view to simplifying the management, holding and operational structures of the Companies in order to increase efficiencies and generate synergies.

The proposed Scheme would be in the best interest of the Companies and their respective shareholders, employees, creditors and other stakeholders.

Further, in the said new era of operations and given above, it is proposed to divide the business operations amongst the Promoters' families, in a manner which allows the newer generations to unlock more value from the conglomerate whilst preserving the goodwill and credibility of the brand. This arrangement allows the families to independently run the management and operations of the allocated undertakings without any conflict. This approach will empower the leaders and the management of the respective segments to make agile decisions tailored to their segments, ultimately driving sustainable growth and improving overall organizational performance.

The Scheme is expected to enable better realization of potential of the businesses and yield beneficial results and enhance value creation for the companies, their respective shareholders, employees, creditors and other stakeholders.

In addition to the above, the Scheme is expected to reap the following benefits:

- (iv) **Investment Attractiveness:** Currently, the conglomerate structure may deter investment in individual operations. The Scheme will allow investors to selectively invest in companies that match their risk and reward expectations, thereby enhancing the commercial feasibility of attracting investments.

In transactions of the nature of merger or amalgamation of companies or merger or demerger of business, the consideration is often discharged primary by issue of security in the nature equity of the acquirer or transferee entity with references to an exchange ratio or entitlement ratio considering the relative values such relative values are generally arrived at by applying an appropriate valuation approach or a combination of valuation approaches.

Premise of Value refers to the conditions and circumstances how an asset is deployed. Considering the nature of this exercise, we have adopted "Going Concern" value as the premise of value.

It should be understood that the valuation of any company or its assets is inherently impressive and its subject to certain uncertainty and contingencies all of which are difficult to predict and are beyond our control

The three main valuation approaches are the asset approach income approach and market approach. There are several commonly used and accepted methods within the asset approach income approach and market approach for determining the relative fair value of the equity shares such as

- i. Asset approach- net asset value method
- ii. Income approach- discounted cash flows method
- iii. Market approach -
 - a. Market Price method
 - b. Comparable companies coated multiples method
 - c. Comparable transaction multiples method

This valuation arrived at under the above-mentioned methods could fluctuate with lapse of time, changes in prevailing market conditions and prospects industry performance and general business and economic condition, financial and otherwise of businesses/ companies and other factors with generally influence the valuation of companies and their assets

Approach - Share Entitlement Ratio for Proposed Demerger

The Scheme contemplates the proposed demerger, transfer and vesting of the Demerged Undertaking, from the Demerged Company into the Resulting Company under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

As per Part II, Clause 18 of Scheme, as a consideration for the proposed demerger of Demerged Undertaking 1, the Resulting Company will allot its equity shares of face value of Rs. 10/- each fully paid up to equity shareholders of the Demerged Company in the Share entitlement ratio.

All the equity shares held by the Demerged Company or its nominees, if any, in the share capital of the Resulting Company, shall, without any further application, act, instrument or deed be automatically cancelled, extinguished and annulled on and from the Effective Date and the paid up equity capital of the Resulting Company to that effect shall stand cancelled and reduced.

The Resulting Company is subsidiary and is wholly owned subsidiaries of Jayashree Polymers Private Limited. We understand from the Management that they do not foresee any change in the shareholding structure between the Valuation Date and the Appointed Date. Post Demerger, once the Scheme is implemented, the shareholders of the Demerged Company would also become shareholders of the Resulting Company, in same proportion as in the Demerged Company. As such, their equity shareholding percentage in the Resulting Company would mirror their equity shareholding in the Demerged Company, such that relative economic interest of the shareholders is same in both the companies. Therefore, no relative valuation is required to be undertaken for proposed demerger, accordingly we have not considered any valuation approach.

The effect of demerger is that each shareholder of JPPL becomes owner of shares of two companies that is JPPL and JPIPL instead of one that is JPPL.

The scheme does not envisage the dilution of the shareholding of anyone or more shareholders as a result of demerger.

Considering the above any entitlement ratio can be considered for the above demerger, such as the proportionate shareholding of any shareholder would not change.

We understand that, pursuant to the Scheme, the Resulting Company shall take necessary steps to increase or alter or reclassify, if necessary, its authorized share capital suitable to enable it to issue and allot the shares required to be issued and allotted under this Scheme.

The proposed Demerger of demerged undertaking 1 from JPPL into JPIPL shall entail entitlement of equity shares of JPIPL to all the equity shares holders of JPPL on a proportionate basis.

In the current instance, the issue of adjusting equity values between different shareholders that usually forms the prime consideration for determining fair entitlement ratio is not relevant and hence no valuation has been carried out.

Any material variation in the equity capital structures of specified companies apart from the above-mentioned scheme may impact the share entitlement ratio.

The results of our valuation and our report will not be permitted to be used or relied by the Company for any other purpose or any other party for any purpose whatsoever. We are not responsible to any other person (party) for any decision of such person/ party based on our report. Conclusion on Fair Share Entitlement Ratio

As per the Part II, Clause 18 of Scheme, the Resulting company is wholly owned subsidiaries of Jayashree Polymers Private Limited. Once the Scheme is implemented, the shareholders of the Demerged Company would also become shareholders of the Resulting Company, in same proportion as in the Demerged Company. As such, their equity shareholding percentage in the Resulting Company would mirror their equity shareholding in the Demerged Company, such that relative economic interest of the shareholders is same in both the companies. Therefore, no relative valuation is required to be undertaken for proposed demerger, accordingly we have not considered any valuation approach.

On the basis of foregoing, any share entitlement ratio can be considered for above demerger, such that the proportionate shareholding of any equity shareholder would not vary.

As proposed by the Management and on consideration of all the relevant factors and circumstances as discussed and outlined herein above, the share entitlement ratio in event of demerger of the Demerged Undertaking 1 of the Demerged Company into the Resulting Company is proposed on a proportionate holding basis as follows:

"1 (one) fully paid-up equity shares of face value of Rs. 10 (Rupees Ten only) each of the Resulting Company for every 1 (one) fully paid-up equity shares of Rs. 10 (Rupees Ten Only) each held in the Demerged Company"

Share Entitlement Ratio

We believe that the above share entitlement ratio proposed by the Management is fair and reasonable considering that all the equity shareholder of the Demerged Company will upon demerger, be ultimate beneficial owner of the Resulting Company in the same ratio (inter-se) as they hold equity shares in the Demerged Company, as on the Valuation Date.

Our fair share entitlement ratio is based on the share capital structure of Specified Companies as mentioned earlier in this Report. Any variation in the share capital structure of the Specified Companies may have material impact on the fair share entitlement ratio.

Valuation Base and Premise of Value

Valuation Base means the indication of the type of value being used in an engagement. Different valuation bases may lead to different conclusions of value.

Share Entitlement Ratio

The Valuation bases used for the Report is "Relative Value" as per valuation standard 103 issued by ICAI RVO. In transactions of the nature of merger or amalgamation of companies or merger or demerger of business, the consideration is often discharged primary by issue of security in the nature equity of the acquirer or transferee entity with references to an exchange ratio or entitlement ratio considering the relative values such relative values are generally arrived at by applying an appropriate valuation approach or a combination of valuation approaches.

Premise of Value refers to the conditions and circumstances how an asset is deployed. Considering the nature of this exercise, we have adopted "Going Concern" value as the premise of value.

It should be understood that the valuation of any company or its assets is inherently imprecise and its subject to certain uncertainty and contingencies all of which are difficult to predict and are beyond our control

The three main valuation approaches are the asset approach, income approach and market approach. There are several commonly used and accepted methods within the asset approach, income approach and market approach for determining the relative fair value of the equity shares such as

- i. Asset approach- net asset value method
- ii. Income approach- discounted cash flows method
- iii. Market approach -
 - a. Market Price method
 - b. Comparable companies coated multiples method
 - c. Comparable transaction multiples method

This valuation arrived at under the above-mentioned methods could fluctuate with lapse of time, changes in prevailing market conditions and prospects industry performance and general business and economic condition, financial and otherwise of businesses/ companies and other factors with generally influence the valuation of companies and their assets

In the current case on the basis of proposed capital structure of JPEPL and considering the fact that the shareholders of JPPL would be ultimate beneficial holders in JPEPL there is no valuation exercise being undertaken and share entitlement ratio is determined based on the intended capital structure of JPEPL kindly refer to below Paras for further details.

- b. Conducting enquiry and understanding of the business of the specified companies. We have understood the rational of Scheme and proposed share entitlement ratio.

- d. Selection of Valuation approach and valuation methodology in accordance with ICAI valuation standards as considered appropriate and relevant by us.
- e. Determination of Share Entitlement Ratio of the equity shares for the proposed demerger.

Approach - Share Entitlement Ratio for Proposed Demerger

The Scheme contemplates the proposed demerger, transfer and vesting of the Demerged Undertaking, from the Demerged Company into the Resulting Company under Sections 230 to 232 of the Companies Act, 2013 and other relevant provisions of the Companies Act, 2013 and rules issued thereunder to the extent applicable.

As per Part III, Clause 32 of Scheme, as a consideration for the proposed demerger of Demerged Undertaking 2, the Resulting Company will allot its equity shares of face value of Rs. 10/- each fully paid up to equity shareholders of the Demerged Company in the Share entitlement ratio.

All the equity shares held by the Demerged Company or its nominees, if any, in the share capital of the Resulting Company, shall, without any further application, act, instrument or deed be automatically cancelled, extinguished and annulled on and from the Effective Date and the paid-up equity capital of the Resulting Company to that effect shall stand cancelled and reduced.

The Resulting Company is subsidiary and is wholly owned subsidiaries of Jayashree Polymers Private Limited. We understand from the Management that they do not foresee any change in the shareholding structure between the Valuation Date and the Appointed Date. Post Demerger, once the Scheme is implemented, the shareholders of the Demerged Company would also become shareholders of the Resulting Company, in same proportion as in the Demerged Company. As such, their equity shareholding percentage in the Resulting Company would mirror their equity shareholding in the Demerged Company, such that relative economic interest of the shareholders is same in both the companies. Therefore, no relative valuation is required to be undertaken for proposed demerger, accordingly we have not considered any valuation approach.

The effect of demerger is that each shareholder of JPPL becomes owner of shares and two companies that is JPPL and JPEPL instead of one that is JPPL.

The scheme does not envisage the dilution of the shareholding of anyone or more shareholders as a result of demerger.

Considering the above any entitlement ratio can be considered for the above demerger, such as the proportionate shareholding of any shareholder would not change.

We understand that, pursuant to the Scheme, the Resulting Company shall take necessary steps to increase or alter or reclassify, if necessary, its authorized share capital suitable to enable it to issue and allot the shares required to be issued and allotted under this Scheme.

The proposed Demerger of Demerged Undertaking 2 from JPPL into JPEPL shall entail entitlement of equity shares of JPEPL to all the equity shares holders of JPPL on a proportionate basis.

In the current instance, the issue of adjusting equity values between different shareholders that usually forms the prime consideration for determining fair entitlement ratio is not relevant and hence no valuation has been carried out.

Any material variation in the equity capital structures of specified companies apart from the above-mentioned scheme may impact the share entitlement ratio.

Conclusion on Fair Share Entitlement Ratio

As per the Part III, Clause 32 of Scheme, the Resulting company is wholly owned subsidiaries of Jayashree Polymers Private Limited. Once the Scheme is implemented, the shareholders of the Demerged Company would also become shareholders of the Resulting Company, in same proportion as in the Demerged Company. As such, their equity shareholding percentage in the Resulting Company would mirror their equity shareholding in the Demerged Company, such that relative economic interest of the shareholders is same in both the companies. Therefore, no relative valuation is required to be undertaken for proposed demerger, accordingly we have not considered any valuation approach.

On the basis of foregoing, any share entitlement ratio can be considered for above demerger, such that the proportionate shareholding of any equity shareholder would not vary.

As proposed by the Management and on consideration of all the relevant factors and circumstances as discussed and outlined herein above, the share entitlement ratio in event of demerger of the Demerged Undertaking 2 of the Demerged Company into the Resulting Company on a proportionate shareholding basis is proposed as follows:

"1 (one) fully paid-up equity shares of face value of Rs. 10 (Rupees Ten only) each of the Resulting Company for every 1 (one) fully paid-up equity shares of Rs. 10 (Rupees Ten Only) each held in the Demerged Company"

Share Entitlement Ratio

We believe that the above share entitlement ratio proposed by the Management is fair and reasonable considering that all the equity shareholder of the Demerged Company will upon demerger, be ultimate beneficial owner of the Resulting Company in the same ratio (inter-se) as they hold equity shares in the Demerged Company, as on the Valuation Date.

Our fair share entitlement ratio is based on the share capital structure of Specified Companies as mentioned earlier in this Report. Any variation in the share capital structure of the Specified Companies may have material impact on the fair share entitlement ratio.

8. Rationale of the Scheme

8.1 Jayashree Polymers Private Limited was incorporated during 1996 and since then it has expanded its business into multiple verticals and geographical locations. Over the last three decades, the business has experienced marketable growth and transformation.

8.2 As the business continues to grow and diversify, the same is demanding for each business to have an independent management to maximize efficiency, drive performance and expansion. The complexity and unique demands of our various verticals and geographical locations necessitate dedicated leadership teams that can focus on the specific challenges and opportunities within their respective markets. By establishing independent management for various segment, it will enhance accountability, foster innovation, and ensure that strategic objectives are met more effectively.

8.3 Further, in the said new era of operations and given above, it is proposed to divide the business operations amongst the Promoters' families, in a manner which allows the newer generations to unlock more value from the conglomerate whilst preserving the goodwill and credibility of the brand. This arrangement allows the families to independently run the management and operations of the allocated undertakings without any conflict. This approach will empower the leaders and the management of the respective segments to make agile decisions tailored to their segments, ultimately driving sustainable growth and improving overall organizational performance.

8.4 The Scheme is expected to enable better realization of potential of the businesses and yield beneficial results and enhance value creation for the companies, their respective shareholders, employees, creditors and other stakeholders.

8.5 In addition to the above, the Scheme is expected to reap the following benefits:

8.5.1. This specialization is anticipated to lead to streamlined operations and improved management control.

- 8.5.3. Effective Risk Management: The separation of the businesses will facilitate the implementation of distinct risk management strategies for each entity, leading to more effective risk mitigation and potentially reducing the overall risk profile of the group.
- 8.5.4. Investment Attractiveness: Currently, the conglomerate structure may deter investment in individual operations. The Scheme will allow investors to selectively invest in companies that match their risk and reward expectations, thereby enhancing the commercial feasibility of attracting investments.
- 8.5.5. Strategic and Financial Flexibility: Post restructuring, each entity will have the autonomy to engage in strategic and financial arrangements independently, which is expected to enhance their capability to pursue collaborations and expansions that are best suited for their market segments.
- 8.5.6. Simplification and Rationalization: The Scheme will lead to a simplification of the holding structure, making it more rational and manageable. This is in line with the objective of creating a leaner and more focused corporate structure.
- 8.5.7. Alignment with Industry Best Practices: The scheme will align the operating structure of the businesses with industry best practices, allowing for strategic focus and financial arrangements that are tailored to the distinct nature of risks involved in each business.

8. Rationale of the Scheme

8.1 Jayashree Polymers Private Limited was incorporated during 1996 and since then it has expanded its business into multiple verticals and geographical locations. Over the last three decades, the business has experienced marketable growth and transformation.

8.2 As the business continues to grow and diversify, the same is demanding for each business to have an independent management to maximize efficiency, drive performance and expansion. The complexity and unique demands of our various verticals and geographical locations necessitate dedicated leadership teams that can focus on the specific challenges and opportunities within their respective markets. By establishing independent management for various segment, it will enhance accountability, foster innovation, and ensure that strategic objectives are met more effectively.

8.3 Further, in the said new era of operations and given above, it is proposed to divide the business operations amongst the Promoters' families, in a manner which allows the newer generations to unlock more value from the conglomerate whilst preserving the goodwill and credibility of the brand. This arrangement allows the families to independently run the management and operations of the allocated undertakings without any conflict. This approach will empower the leaders and the management of the respective segments to make agile decisions tailored to their segments, ultimately driving sustainable growth and improving overall organizational performance.

8.4 The Scheme is expected to enable better realization of potential of the businesses and yield beneficial results and enhance value creation for the companies, their respective shareholders, employees, creditors and other stakeholders.

8.5 In addition to the above, the Scheme is expected to reap the following benefits:

8.5.1. Specialized Management: By establishing separate management based on the requisite skills and expertise, the Scheme aims to enhance core business operations of the respective undertakings and business operations. This specialization is anticipated to lead to streamlined operations and improved management control.

8.5.2. Focused Strategy: The Scheme will enable the management to concentrate on the business of the respective undertaking, thereby allowing the management to efficiently explore opportunities and develop strategies tailored to the specific needs of the respective business undertaking.

8.5.3. Effective Risk Management: The separation of the businesses will facilitate the implementation of distinct risk management strategies for each entity, leading to more effective risk mitigation and potentially reducing the overall risk profile of the group.

8.5.4. Investment Attractiveness: Currently, the conglomerate structure may deter investment in individual operations. The Scheme will allow investors to selectively invest in companies that match their risk and reward expectations, thereby enhancing the commercial feasibility of attracting investments.

8.5.5. Strategic and Financial Flexibility: Post restructuring, each entity will have the autonomy to engage in strategic and financial arrangements independently, which is
